

FORK EXTENSIONS

FORK EXTENSIONS are not all the same. There are very important differences in shape, construction and usability. Trading Point Products sells the ZyAtWork® brand fork extension.

FORK EXTENSIONS MUST NOT EXCEED 50% OF FORK LENGTH

STANDARD DUTY EXTENSIONS have an open bottom and a closed loop heel strap. Most others use soft structural "C" channel material.

WE MAKE OURS FROM FORMED STEEL PLATE FOR ALLOY STEEL STRENGTH.

tapers are 12 inches long.

The side walls are formed to provide a narrow width tip for easier entry into pallets and pockets.

The tips are re-enforced with a tip insert of hardened steel. This increases the impact resistance and extends service life.

Large loops make for easy installation

HEAVY DUTY EXTENSIONS have a fully enclosed bottom surface. The floor plate is welded 100% around.

The retaining straps are secured by a self locking pin.

The tapered tips are fully enclosed and are re-enforced by hardened steel plate inserts.

HD Extensions are used where there will be tip loading or when extra long extensions are to be used.

HD extensions have the same side taper as standard extensions and a 12 inch bottom taper.

FORK EXTENSIONS

STANDARD FORK EXTENSIONS

MODEL	FORK WIDTH MAX.	FORK THICK. MIN-MAX	EXT. LENGTH INCHES	WT LB PAIR	PRICE PAIR
FE104/45-O-48	4	1.25" - 2"	48	53	\$124
